Subject: Planning Application reference 2022/1187/T

I would like to object to the Central and Cecil Housing Association Insurer's request to fell two trees in the garden of 102-104 Albert Street NW1, (planning reference 2022/1187/T).

I live in Delancey Street and my garden backs onto the square of gardens in which the two trees listed in the above planning reference are located. These are established trees and add to a green oasis and habitat for wild life and would be a huge loss and leave a gaping hole. It's a very special area and needs to be preserved. The listed trees are located at the end of the gardens in question and surely could be pruned rather than felled? In all the years I have lived here, Camden Council have been very firm in its policy on the preservation of trees and taken a keen interest to make sure residents do not fell listed trees in their gardens. We have very few trees in the immediate vicinity and any tree lost, is another nail in our fight for clean air.

I hope you will decline this request.

Kind regards
Catherine Colley
