Subject: Ref: Application 2022/1398/T- objection

08/04/2022
To Camden Planning Office.

Dear Sir or Madam,

Today I have received a letter from [Camden.gov.uk/planning](https://www.camden.gov.uk/planning) dept. dated 01.04.2022 informing the 'effected' residents of the above application. I have viewed the photos on the Camden gov. uk but I feel they are limited as they reference T1-T4.

I object to any trees being reduced or removed that would impact on my views. Any changes to trees that are on the side that backs on to the garden of 29 Hampstead Lane N6. This would significantly impact to me as I am on the first floor flat, which is higher up and my windows look directly in this direction of this house and garden.

My beautiful green trees views have been effected only last week as a summer house has been agreed and erected, at the bottom of the garden to No. 25 Hampstead Lane (which backs onto Summit House) and the wall and trees behind the Summer house have been removed resulting in that now I am seeing right into the house named (Summit Fitzroy Park N6 6HS). The lights from this house are on all the time.

My views into neighbours' homes is not acceptable and are being notably changed.

Also the noise factor. There has been complaints of a dog continuous barking from this house or nearby house and the trees are an important screen and noise barrier.

So I object on the grounds this will impact to my views, my privacy and I will have an outlook into this house called Summit house.

These Fitzroy Park residents are surrounded by green trees whereas I only have these green views as the other side of 29 Hampstead Lane is the busy polluting Lane.

Yours Faithfully

Doreen Gugenheim
