Bethany

I wish to object to the removal of these two mature trees in the Garden of 102-104 Albert Street which is used as a hostel by Central and Cecil Housing Association.

Their insurer's have requested planning consent to fell these 2 big trees in their garden. These are listed trees in a conservation area. They are quite some distance from their buildings. Some pruning might be appropriate, but felling them is going to be an incredible loss to many of neighbours views of this large green oasis, (green lung of Camden) as well as affecting the biodiversity and air quality of the area in general.

Thanks Pat Callaghan
