ynn 08/04/	/2022 09:28:30	SUPPRT	Dear sirs		
			I live close to the eastern entrance to the development in Camden Street. I write strongly in favour of the application. It is absurd to shut these facilities at 2100 and if it were open later I would be more likely to make use of it myself. It is clear footfall is poor and perhaps this adds to the oppressive security which can make the place feel a little foreboding and unfriendly, especially when it is (as often) closed and locked up. I would rather see it integrated more fully into the normal street-life and community of Camden. I have encountered no noise or other problems from the facility. I also empathise with the traders who are clearly struggling.
