

Rafi Miah

Sir

Am a owner & resident of a flat for 20 years.

This is a bizarre proposal & should never be permitted.

We have just got the roofing/piping /wiring redone at a high cost & months of work.

There are different wifi's including B T working fine for long.

We are a peaceful residential society with nationals of many countries residing here.

NOT a Commercial environment.

Kindly look for alternatives if at all the proposal is to be considered.

Lowlands should never feature & the suggestion reversed.

With good wishes

Ajit Narain
