

Rafi Miah

Dear Sirs:

As part of a representation of our opposition to application 2021/2954/P we would like to strongly support the views expressed by Peter Bloxham in his email to David Fowler below and wanted to get this statement to you prior to the meeting on Monday 25 April. I would add that If this development were realized our East facing windows would be directly and closely overlooked with a consequent loss of privacy and light, and our view blocked. Also, this development seems greatly overbearing given the existing fabric of the neighbourhood. It is therefore deeply disturbing that despite the developer's previous gestures toward neighbourhood consultation (some of which we participated in) relatively few of the major problems of the projection -- i.e., none of the issues of light and proportion -- have been seriously addressed.

Yours,
Ronald and Marilyn Bush

Flat 5, 3 Grape Street, London WC2H8DX
