2022/0587/P	Mr Tanna	23/04/2022 14:04:14	OBJ	The proposed extension will negatively impact the existing levels of daylight or sunlight into my basement flat. I therefore strongly object to the proposed extension as it will significantly reduce the natural daylight in the rear rooms.
2022/0587/P	Andrew Quick	23/04/2022 17:34:29	OBJ	We would only be concerned by the impact on how much light we would lose if this application gets approved. It isn't very clear on the proposal but we note the concern of others in this regard. Our garden would appear to be at risk of being affected. Would you be able to help clarify this point please? A light study feels like it might be helpful here? Unless there is one and we can't find it. If the light isn't impacted then we'd have no objection.
2022/0587/P	John Norman	23/04/2022 07:18:35	OBJ	I object strongly to the proposed extension as it will significantly reduce the natural daylight in the rear rooms of my ground floor flat. Space at the rear of our property is already tightly restricted. The proposed extension will reduce this further. The proposed extension will have a deleterious effect on the appearance of the rear of the terrace as existing additions are to ground or first floor.
2022/0587/P	Rosalind Blachowska	24/04/2022 12:12:36	OBJ	I really oppose this plan, as it will greatly reduce the light in Flat 3 and Flat 4, 13 Chalcot Road. This rear area is already tightly cramped, and this will exacerbate the problem. Secondly it is out of character with the terrace, which is in a conservation area, and it will significantly change the appearance of this area.
