2022/0739/P	Clare muller	29/04/2022 17:02:50	OBJ	<p>with double glazed windows in this listed building.</p> <p>The proposed replacements will have a modern, mechanical appearance not in keeping with the appearance and ambience of the street.</p> <p>The glass reflection of double glazing has a flat, mirror-like reflection as in modern office blocks.</p> <p>There are existing original Victorian glass panes in some of the windows.</p> <p>The fine proportions of the original sashes will be replaced by a slightly clumsier modern replacements.</p> <p>The environmental impact of removing and disposing of the perfectly good existing windows to landfill and the importing of timber and glass for replacements is questionable.</p> <p>Allowing this would set a grim precedent for this uniquely preserved beautiful street.</p>
2022/0739/P	Lewis Durham	29/04/2022 09:45:31	OBJ	<p>This is a strong object to the removal of original victorian sashes and the installation of double glazed windows in this listed building on its unique early victorian street.</p> <p>The new modern windows will not be in keeping with the victorian aesthetic and feel of the street.</p> <p>Some of the windows pains are still the original, over 100 years old, victorian glass.</p> <p>Modern double glazing glass, as seen in new office builds, has a flat appearance that does not reflect the light in the same way as victorian glass. New glass reflection is very mirror like again, killing the aseptic of the street.</p> <p>The new double glazing units will be clunkier in size compared to the the original sashes with their fine proportions.</p> <p>The environmental impact of replacing perfectly good windows with all new materials like timber, glass and aluminium (including manufacturing and transport) from around the globe is not good at all.</p> <p>Approval of this would allow this beautiful streets feel and look to be compromised further by others.</p>
2022/0739/P	Graeme Durham	27/04/2022 11:38:15	OBJ	<p>I strongly object to the replacement and installation with double glazed windows in this listed building.</p> <p>The proposed replacements will have a modern, mechanical appearance not in keeping with the appearance and ambience of the street.</p> <p>The glass reflection of double glazing has a flat, mirror-like reflection as in modern office blocks.</p> <p>There are existing original Victorian glass sections in some of the windows.</p> <p>The fine proportions of the original sashes will be replaced by a slightly clumsier modern replacement.</p> <p>The environmental impact of removing and disposing of the perfectly good existing windows to landfill and the importing of timber and glass for replacements is questionable.</p> <p>Allowing this would set a grim precedent for this uniquely preserved beautiful street.</p>

2022/0739/P	Graeme Durham	27/04/2022 11:38:12	OBJ	<p>I strongly object to the replacement and installation with double glazed windows in this listed building.</p> <p>The proposed replacements will have a modern, mechanical appearance not in keeping with the appearance and ambience of the street.</p> <p>The glass reflection of double glazing has a flat, mirror-like reflection as in modern office blocks. There are existing original Victorian glass sections in some of the windows.</p> <p>The fine proportions of the original sashes will be replaced by a slightly clumsier modern replacement.</p> <p>The environmental impact of removing and disposing of the perfectly good existing windows to landfill and the importing of timber and glass for replacements is questionable.</p> <p>Allowing this would set a grim precedent for this uniquely preserved beautiful street.</p>
2022/0739/P	Laura Connolly	30/04/2022 16:57:32	COMMNT	<p>I object to the removal of the original victorian sashes and the installation of double glazed windows in this listed building in this original early victorian street.</p> <p>The new modern windows will not be in keeping with the victorian aesthetic and feel of the street, removing an aspect of it's history and preservation.</p> <p>Some of the windows panes are still the original over 100 year old Victorian glass. There is no reason these can't be repaired and restored without gutting out this original feature.</p> <p>Modern double glazing glass, as seen in new office builds, has a flat appearance that does not reflect the light in the same way as victorian glass. These will stand out among the other homes and have a negative impact on this uniquely beautiful street.</p> <p>The new double glazing units will be clunkier in size compared to the the original sashes with their fine proportions.</p> <p>The environmental impact of replacing perfectly good windows with all new materials like timber, glass and aluminium (including their manufacturing and transport) from around the globe is not good or eco-friendly at all. All other homes on this street function perfectly well with their original windows and claiming this to be a more efficient decision is completely unfounded.</p> <p>Approval of this would allow this beautiful streets feel and look to be compromised further by others and destroy the history of Camden and this special borough. We must protect and respect what history we have left as this makes us so uniquely British.</p> <p>Thank you for your time and consideration.</p>

2022/0739/P	Kitty Durham	30/04/2022 15:20:25	OBJ	I strongly object to the replacement and installation with double glazed windows in this listed building. Kelly Street is one of the most beautiful streets in London and to remove the perfectly good original sashes and windows would be a huge disappointment and ruin the look and feel of these historic buildings. It is completely unnecessary and environmentally unfriendly.
