2022/1445/L	Graeme Durham	27/04/2022 11:35:53	OBJ	<p>I strongly object to the replacement and installation with double glazed windows in this listed building.</p> <p>The proposed replacements will have a modern, mechanical appearance not in keeping with the appearance and ambience of the street.</p> <p>The glass reflection of double glazing has a flat, mirror-like reflection as in modern office blocks. There are existing original Victorian glass sections in some of the windows.</p> <p>The fine proportions of the original sashes will be replaced by a slightly clumsier modern replacement.</p> <p>The environmental impact of removing and disposing of the perfectly good existing windows to landfill and the importing of timber and glass for replacements is questionable.</p> <p>Allowing this would set a grim precedent for this uniquely preserved beautiful street.</p>
2022/1445/L	Rosemary Fitzgerald	30/04/2022 17:33:25	SUPPRT	<p>I strongly support this application, which is a carefully considered proposal to carry out general repairs and green retrofitting to make a small Victorian property significantly more energy efficient while also conscientiously respecting the building's listed status. Given the current escalation of the climate crisis, it is vital that residents occupying listed buildings are allowed to play an appropriate part in addressing this global emergency.</p> <p>In this particular planning application, I am especially impressed by the applicants' thorough research on the most sensitive way to approach the maintenance and repair of mid-nineteenth century windows. They clearly demonstrate their awareness of the privileges and the responsibilities that come with living in a listed property. Their plan to preserve the original wooden window frames and to fit newly available ultra-thin double glazing within those frames will hopefully be seen as well worth supporting. After all, it is hard to imagine that any of the existing glazing has intrinsic architectural merit, given it is unlikely to date back to the early Victorian period and is more likely to be glazing installed during the latter part of twentieth century.</p> <p>I hope this planning application will receive sympathetic consideration and gain full approval.</p>

2022/1445/L	Lewis Durham	29/04/2022 09:47:13	OBJ	<p>This is a strong object to the removal of original victorian sashes and the installation of double glazed windows in this listed building on its unique early victorian street.</p> <p>The new modern windows will not be in keeping with the victorian aesthetic and feel of the street.</p> <p>Some of the windows pains are still the original, over 100 years old, victorian glass.</p> <p>Modern double glazing glass, as seen in new office builds, has a flat appearance that does not reflect the light in the same way as victorian glass. New glass reflection is very mirror like again, killing the aseptic of the street.</p> <p>The new double glazing units will be clunkier in size compared to the the original sashes with their fine proportions.</p> <p>The environmental impact of replacing perfectly good windows with all new materials like timber, glass and aluminium (including manufacturing and transport) from around the globe is not good at all.</p> <p>Approval of this would allow this beautiful streets feel and look to be compromised further by others.</p>

2022/1445/L	Ingrid Weiss	28/04/2022 10:54:24	COMMNT	I strongly object to this proposal, in particular the double glazing. I can see that they are going for full on insulation but then why buy a listed property in the prettiest historic street in Camden? Utterly disgraceful to even consider replacing the Victorian windows. Please respect what is left of our our architectural heritage.

2022/1445/L	Laura Connolly	30/04/2022 17:02:23	COMMNT	<p>I strongly object to the replacement and installation with double glazed windows in this listed building.</p> <p>The proposed replacements will have a modern, mechanical appearance not in keeping with the appearance and ambience of the street.</p> <p>The glass reflection of double glazing has a flat, mirror-like reflection as in modern office blocks.</p> <p>There are existing original Victorian glass sections in some of the windows.</p> <p>The fine proportions of the original sashes will be replaced by a slightly clumsier modern replacement.</p> <p>The environmental impact of removing and disposing of the perfectly good existing windows to landfill and the importing of timber and glass for replacements under the guise of being 'environmentally friendly' is questionable and 'historically unfriendly' as this will not only create an eyesore on this special street but modernise a listed home giving it more of an office look than a home.</p> <p>Allowing this would set a grim precedent for this uniquely preserved beautiful street.</p> <p>Thank you for your time and consideration. Blessings xx</p>
