Dear Sir

Piling:- Platform Loading Information Letter

Please find attached the rig bearing pressures. These bearing pressures are based on a typical rig from our fleet. For operational reasons we reserve the right to change the type of rig used on the project. We confirm that the bearing pressures for the rig we use will not exceed the bearing pressures attached, they may, however be lower.

It would be prudent to carry out plate bearing tests prior to designing and installing a piling mat. This may provide significant savings by reducing the thickness of, or negating the need for an imported stone/hardcore

Regards
Kevin Annison
