Overview

10.01 Summary

Our proposals have been developed to provide an extended and upgraded front of house to the wider refurbished commercial offer at the Heal's Building. With additional services and functions that both serve these spaces, and the wider community.

They utilise both a rather under used part of the building, and breathe new life into Alfred Mews itself, creating a more activated frontage that could accommodate a wider public offer to the street.

These alterations also work to better serve the historic facade of Alfred Mews, re-creating the historic proportions through revealing the brick piers and stone lintel by the removal of poor quality industrial shutters, for more informed sensitive fenestration.

The overall strategy works with the wider phasing to create a more efficient and functional use of the Heal's Building for a new generation of tenants.
