2022/1068/P	Susanna Miller	15/05/2022 19:24:24	OBJ	<p>The building is a good example of its type and era and makes a positive contribution to the appearance of this part of Kentish Town Road. I have no objection to the proposals in principle but my objection is on appearance and detail design terms. The conservatory is alien and out of keeping with the building as a whole, conservatories are not suitable at first floor where they become overly visually dominant illuminated glass boxes, causing glare and light pollution at night and at low light levels. Any first floor extension should have a design with a solid to void ratio closer to the host building and should not be an overly glazed and alien design anomaly. The existing windows are traditional timber 2 over 2 sliding sash windows, the proposed windows are poorly detailed and alien in design and material to the prevailing architecture of the host building.</p>
