2022/1675/HS2	LB	18/05/2022 09:38:20	OBJ	<p>This application affects Park Village East in its entirety, not just Nash House as continually alluded to. It is residential blocks like Silsoe, Richmond & Cubitt that will incur the direct visual impact & other environmental concerns - increased noise in an open cutting area; the concrete slab offers no noise mitigation measures & is most likely to simply reflect sound, especially with no protection as before from the parapet wall & vegetation. The design needs review. It is an unsightly slab that is not in keeping with the historical design of Park Village East. Vegetation has been lost & needs to be replaced, not by concrete. More details & assurances should be offered by HS2. I agree with the objection/comments made by Camden Council - the design & impacts on Park Village East need to be reviewed & more sympathetically considered towards heritage assets & environmental impact.</p>
