Dear Mr Marfleet

Further to the email to you by Kate McLaren of TRACT I write to add my support to her objections to the planning application. Specifically related to noise:

As a nearby resident to the planned works I strongly object to this application in its current form. Most importantly the planned 'event' spaces of 90 and 120 people. This is a residential area. Ambient noise of so many people will carry like a giant party. If music is allowed too this will be incredibly disruptive whether done in the daytime or the evening. Camden Market and the newly regenerated Hawley Wharf are the places for mass public gatherings, not this quieter residential area. In addition the intention for the arches under the railway to be used in conjunction with the events space likewise will be noisy and disruptive in particular to numbers 5 and 7 Prowse Place and those on Camden Street whose properties are direct neighbours. The event areas should not be allowed.

Looking at the lighting scheme the intention appears to be for night time events. Events should not be allowed under any circumstances in the evening.

Regards

Chloe Hall
