2022/1403/P	Manfred Berners	28/05/2022 09:50:50	OBJ	We are fighting a climate emergency and this application proposes to put a heat capturing sky light into a currently insulated roof - hence requiring an air conditioning unit . We can not afford to add air conditioning units to our neighbourhood and achieve being net zero carbon in camden by 2030
2022/1403/P	Andrew Reiss	28/05/2022 15:40:20	OBJ	I believe it could set a negative precedent if noisy installations are permitted. The neighbourhood is tranquil, and a change in character would be unwelcome.
