2022/2207/T	B A Abraham for the Belsize Society	04/06/2022 17:46:05	OBJ	<p>The felling of this tree would be detrimental to the neighbourhood in that it would destroy part of the green canopy that offers a sense of wellbeing to local residents, as well as providing some protection against air pollution. The tree also forms part of an extended wildlife habitat at the rear of Belsize Park Gardens and Glenilla Road. A number of trees have been lost in recent years from this green corridor at the rear of Belsize Park Gardens and Glenilla Road, and those remaining should be preserved whenever possible. In view of all the environmental benefits attaching to the tree, it should take priority over the boundary wall, which can be reconstructed to accommodate the tree.</p>
