Dear Sir/Madam

Re: Proposed Residential Development
24 Heath Drive, London, NW3 7SB
Application ref: 2018/0914/P and 2018/0981/L - condition no.9

I confirm that I, Andy Ilsley of Form Structural Design Limited (Form), have been appointed by The Estate Office as the project structural engineer for the above project, providing a full service.

I further confirm that I am a Chartered Structural Engineer (CEng MStructE) with over 30 years of experience and that Form have been appointed to design and supervise the construction of the new building's structural elements.

Form have undertaken over 200 similar projects in Camden, The Royal Borough of Kensington & Chelsea and Westminster over the last 14 years with retrospective and new build subterranean aspects to the developments.

Our rigorous approach to design is brought to all of our projects to minimise the risk of problems arising, both during the construction works on site and beyond. This risk management applies not only to the buildings and sites being developed and refurbished but also to the adjoining properties and sites.

This role will typically involve frequent site visits at the very beginning of the contract during the ground works element and lesser intervals thereafter to confirm the structural frame and reinforcement arrangements are in accordance with our drawings and specifications. The project is design reviewed and checked at all key stages by the company Principal or Directors in accordance with our ISO 9001 accreditation.

I hope this will be satisfactory but should there be any queries then please do not hesitate to contact me.

Yours faithfully

Andrew Ilsley CEng MStructE | Principal
