Proposal to add glazed doors to Jack Straws Castle lobby. (Drawings 1370-22 & 1370-23)

The double doors on the east side of the north elevation of Jack Straws Castle access the lobby entrance to the existing flats giving level access from the carpark to the lift. It is proposed that the existing solid doors (See Photograph 1 in Appendix A) are replaced with half glazed doors to add natural light to the lobby. The doors are made of painted hardwood in a hardwood frame.

## Appendix A.
