Subject: Fwd: Web Comments on O2 application

Dear Daniel and David,

Subject: Web Comments on O2 application 2022/0528/P

A number of groups have asked several times over the past weeks for Camden Planning to update the misleading '**comments until**' date on the O2 application info on the website and received reassurances from Cllr Beales and others that the timing for comments pre-committee has been extended and that the incorrect date did not matter. It seems it does matter as apart from confusing people, the option to comment has now expired.

The [Add Comments](#) link on the Camden planning website for this application has vanished and residents who wish to are unable to post comments

It looks like this - as of 9/6/2022:

Application Progress Summary

Please note that if the **Comments Until** date shown is before the **Application Registered** date this is because either:

- we are not required to consult on the application (you can check this in our [Statement of Community Involvement](#)); or
- the formal consultation period has not yet started by the application being advertised in the local newspaper or site notice(s) being put up at the application site.

Application Registered	16-02-2022
Comments Until	02-06-2022
Date of Committee	
Decision	
Appeal Lodged	
Appeal Decision	

If this is an IT problem, can it be corrected asap and the date amended to reflect the real situation and protect people's right to comment. Your help with this would be very welcome.

Many Thanks,

Brigid Shaughnessy
