

Roman cement moulding to match original re-run at original level.
Roman cement band under saltire blocks - note Roman cement infill to North side (ref Plan GC 601) with open saltair blocks to remaining (West) wall. Gate posts as existing.

Reinstatement of the saltaire detail between London stock brick piers bond identical to original examples adjacent to the house, verified using archive photographs of the house.

Mortar and pointing to be lime/sand finished flush to brick faces using hessian to reveal granular finish (not trowel finish/weather struck).

Exosting beech hedge to remain fully visible through saltire open blocks.
