2022/1509/P	Sissel Godfrey	09/06/2022 12:39:40	OBJ	<p>I have looked at the plans and firstly feel that there is not enough detail for a proper decision to be made. Secondly this has the feel of a building that will eventually be converted into a house with the inclusion of bathroom and increase in size.</p> <p>I could not see the window on the side of the building so am not sure whether it will be overlooking the heath or adjoining land.</p> <p>The adjoining land has had permission for a house to be built along the adjoining fence. I wish to make sure that this will not affect the rights of light that a building of this size so close to the fence will cause especially as the new proposed building benefits from natural light on the south side of the building.</p> <p>I may wish to add more to this objection</p>
