Reason: To safeguard the special architectural and historic interest of the building in accordance with the requirements of policy D2 of the London Borough of Camden Local Plan 2017.

#### Informative(s):

##### 1 Reasons for granting listed building consent

Permission is sought for amendments to the previously approved proposals to allow for the removal of the Tower mixed mode ventilation duct brickwork (Mezzanine Level, and between Levels 01 -14). It is proposed that the outer brickwork layer at Mezzanine Floor Level will be removed, whilst the outer and inner brickwork layer on Levels 01 - 14 will be removed. This will allow for new reinforced concrete (RC) slabs to be installed at Mezzanine Floor Level and Levels 01 - 02, and RC beams to be connected from Levels 03 - 14. The RC wall behind the brickwork will be retained.

The proposed amendments are required to reflect discoveries made on site during the construction process which require changes to the previously approved drawings to allow the build out of the approved scheme.

A heritage note accompanies the application which concludes that the discovery of the ventilation duct brickwork on site - which was not previously known to exist - is of no historic or architectural interest. The heritage note states that the brickwork is simple and forms part of the basic construction of the building rather than forming a visible finish or fixture within the building's interior. As such, the proposals would cause no harm to the listed building and there would be no impact to the building's special interest.

Camden's Conservation Officer agrees with this conclusion and does not consider the removal of this fabric to harm the significance of the building. Overall, the proposed amendments would still ensure the development would preserve the special architectural and historic interest of the listed building, which resides largely in the principal external elevations of both buildings. The interiors of the building were originally designed to be flexible for the sake of commercial use and have since been extensively refurbished; therefore there is little of significance internally. The removal of additional areas of fabric, would not harm the significance of the building.

It has been agreed with Camden's Conservation Officer that a photographic dossier, including the location of the elements noted on plans, shall be compiled, collating and recording all the relevant site findings during the on-going construction phase.

No objections were received prior to the determination of this application. The site's planning history has been taken into account prior to making this decision and special regard has been attached to the desirability of preserving the listed building and its features of special architectural or historic interest, under s.16 of the Planning (Listed Buildings and Conservation Areas Act) 1990 as amended by the Enterprise and Regulatory Reform Act [ERR] 2013.

As such, the proposed development is in general accordance with policy D2 of the Camden Local Plan 2017. The proposed development also accords with the London Plan 2021 and the National Planning Policy Framework 2021.

- 2 You are advised that any works of alterations or upgrading not included on the approved drawings which are required to satisfy Building Regulations or Fire Certification may require a further application for listed building consent.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraph 38 of the National Planning Policy Framework 2021.
