Ms Enya Fogarty  
Planning Officer,  
London Borough of Camden

Dear Ms Fogarty,

Planning application 2022/1233/P

I am writing to support the application by Neil Beard to replace the current, flimsy 1970s style wrought iron gate with the solid wood gate as shown in the application documents as there are examples of both in St Marks Crescent and that adds to the variety of the road

Many thanks

Yours sincerely,

A R Ashman

-------------	----------------	---------------------	------

I am writing as a long time resident of the area and someone who feels passionately about the proper restoration of the houses around Primrose Hill which, in many cases, has helped repair the damage that was done to them by out of character modernisation in the 1960s-90s. In the course of the works that have been carried out to no.31 over the last couple of years, enormous trouble has been taken to restore the exterior look of the property. The current cast iron gate is not in keeping with the kind of gate that would have originally been installed on this property. The proposed wooden replacement is both in keeping with this property and many others in the surrounding streets.

It has my full support and will help enhance the original look of this property.
