Subject: Planning Application 2022/2713/T Site Address14 Greenaway Gardens
London NW3 7DH

We fully support the proposed felling and management of trees and bushes at 14 Greenaway Gardens as proposed in their application.

We live on Chesterford Gardens backing onto the gardens of 14GG. We have carefully studied with our garden specialist and welcome their plans for introducing mature and diverse specimen trees to replace the largely out of control, unstable trees and shrubs that have been neglected for decades. The latter have been unsafe as large branches have fallen into our garden during storms whilst young children lived here over the years. Importantly, their overall plan appears to be reducing old hard landscaping and replacing with new mature species and greenery offering new habitats for wildlife.

This plan will reduce global warming, be beneficial to the environment, to the aesthetic look of a well-managed park, and to our long term safety.
