

Subject: Application for lighting

required.

Application 2022/2334/A

Hi I'm a resident off 74 Neal street and live directly opposite the abandon ship bar I would like to oppose this application for new lighting on the front off this bar/ restaurant the lights they have on at the moment is very intrusive the red light is directly opposite my living room & kitchen and it's very bright.

I can only imagine this will be even worse and they don't turn the lights off until midnight I would really hope because we live so close & directly opposite that you will consider how this affects the local residents when considering this application Thanks Martina healey Flat 1
