[REDACTED]

Dear Sir/Madam,:

Re: Planning Application 2022/2445/P

We wish to also object to this specific planning request. Whilst we have no issues with our neighbours increasing the size of their home and carrying out the existing works that have already been approved by Camden, the addition of a balcony with clear views to both sides will definitely negatively impact ours and our other [REDACTED].

At the moment the current configuration of Fairfax Place affords all residents a [REDACTED], and the addition of a balcony will afford [REDACTED] as well as our neighbours courtyards. In addition to this, we also don't want to see our neighbours [REDACTED]. If the pandemic has taught us anything, the increased needs of respecting each other's [REDACTED] has become paramount.

I should stress that overall we are overall in favour of the works being carried out by our neighbour, however this should not be at the cost of reducing our privacy, and this request clearly does not pass the basic privacy test. Nobody else in the mews has been granted such a request, and setting this precedent would be dangerous.

Sincerely,

29 Fairfax Place, NW6 4EJ
