2022/0528/P	Shan chang	03/08/2022 23:10:12	SUPPRT	As a local resident I wholeheartedly support the plans. The area is effectively a brownfield site and very much under-utilised - in particular for an area of London with such good transport links. I think these plans will contribute meaningfully to housing supply in the area as well as improve the quality of the built environment, and my view is that we should push on before potential economic recession risks derailing plans.
