

MAREK WOJCIECHOWSKI ARCHITECTS  
LONDON

London Borough of Camden,

15<sup>th</sup> August 2022

Dear Sofie Fieldsend,

**RE: Section 73 – PV Panels (2020/1945/P)**

Further to our recent email correspondence we are submitting a S73 application to cover the addition of PV panels to the main roof of the property located at 7 Branch Hill. These PV panels are required in order to achieve the 20% reduction in carbon emissions from renewable energy sources required from the dwelling – a requirement from the Sustainability Plan dealt with under the Section 106 Agreement.

The following documents have been updated/provided to indicate the proposed extent of photovoltaic cells to be installed on the building:

- P\_05\_Proposed Roof Plan (revision D)
- P\_07\_Existing and Proposed Branch Hill Elevation (revision D)
- P\_08\_Existing and Proposed Front Elevation Section (revision D)
- P\_14\_Existing and Proposed Section AA (revision E)
- P\_16\_Existing and Proposed Section CC (revision E)
- P\_17\_Existing and Proposed Section DD (revision E)
- PV Panel Datasheet
- Mounting System Datasheet

I can confirm that measures shall include the installation of a meter to monitor the energy output from the renewable energy system being installed at roof level. The following documents have been provided detailing the inverter and app system:

- Growatt MIN 2500-6000 TL-X datasheet
- Growatt ShinePhone phone app datasheet

The cells shall be installed in full accordance with the details approved by the Local Planning Authority and permanently retained and maintained thereafter.

I trust that this is clear but if not, do not hesitate to contact me with any queries.

Kind regards,

Sam Wood
