[EXTERNAL EMAIL] Beware – This email originated outside Camden Council and may be malicious. Please take extra care with any links, attachments, requests to take action or for you to verify your password etc. Please note there have been reports of emails purporting to be about Covid 19 being used as cover for scams so extra vigilance is required.

For the attention of Ms. Sofie Fieldsend

Dear Ms. Fieldsend,

Further to my previous email which was sent on 15th August and to which I do not seem to have received a reply.

I am interested to know whether the deadline has been extended and until which date, please.

Once again I would like to point out that I am extremely concerned about the disruption, noise and dirt which will be created by this project and these should be kept to a minimum.

I am objecting to the extension at the back of the project because that fact will diminish our privacy as it will be possible to overlook our balconies and gardens from there. I am also concerned about the loss of daylight into my various windows which are merely a couple of meters distanced from No. 61.

Furthermore I am objecting to the extension at the back as it will involve excavating a basement and this fact will disturb the water table underground. I believe there is an underground stream running under the area in question, our garden gets flooded quite frequently in rainy weather and this would obviously only get worse should there be any more obstruction to the way the groundwater circulates.

Consequently, I very strongly object to the application being granted without the plans being adjusted.

Looking forward to hearing from you,

Many thanks,
Kind regards,

Karin Orlik

Begin forwarded message:

To whom it may concern:

As I have been away on holiday and have only just noticed that the planning application had been posted in the street outside in my absence I would like to apply for an extension of the expiry date, so that I can fully appreciate and understand the complications involved.

I am extremely concerned about the issues of disruption and noise, structural damage, being overlooked and loss of access to daylight and skyline. Would you please take note and for your information no effort was made at any time by the owners' architects or design studio to make an appointment to gain access to my flat to assess and determine the situation regarding the last two points mentioned.

Consequently, I very strongly oppose the application being granted for the time being.

Karin Orlik
