2022/3110/P	Melanie	20/08/2022 10:13:00	COMMNT	I think the roof design is consistent in Elliott Sq like 24-32 and recently approved 10-15 Elliott square which I think is very important that the same design is adhered to I believe the proposed design will improve the energy efficiency of the existing property and reduce its carbon emissions
2022/3110/P	Jackie Adler	20/08/2022 19:03:06	COMMNT	I approve the proposed roof extensions that are planned to be in keeping with the other houses in Elliott Square
2022/3110/P	Alison Broomer	20/08/2022 04:24:08	COMMNT	The design is similar to the existing roof extensions at No's 24-32 Elliott Square and those recently approved for No's 10-15 Elliott Square. <ul style="list-style-type: none"> ∩ Having a consistent design approach ensures the architectural quality of the Square is maintained. ∩ The mansard type design is much more sympathetic to the existing buildings and would be less bulky than a straight up extension in line with PDR guidelines. ∩ The proposed design and construction to current standards will improve the energy efficiency of the existing property and reduce its carbon emissions.
