2022/3382/T	Magdalena Goryczko	29/08/2022 19:31:11	COMMNT	I am unclear as to why Application ref: 2022/3382/T refers to Front Garden (T1) when the letter I have received on the 9th August 2022 with the same ref. reads the following: The proposed work to the Rear Garden: 1xMaple (T4) - reduce the lateral crown spread from neighbouring Maple back to the boundary line 2m-3m. I do not have any objection to the reduction if it could ultimately prevent taking down the tree. In terms of the front garden I do not understand why same could not be done to the tree at the front? This is a beautiful tree which forms part of the landscape and it seems to me that preservation of the tree should be prioritised. There is no explanation as to why less drastic measure is not implemented (tree pruning).
