

Ainsworth Way – Essential Gas Works

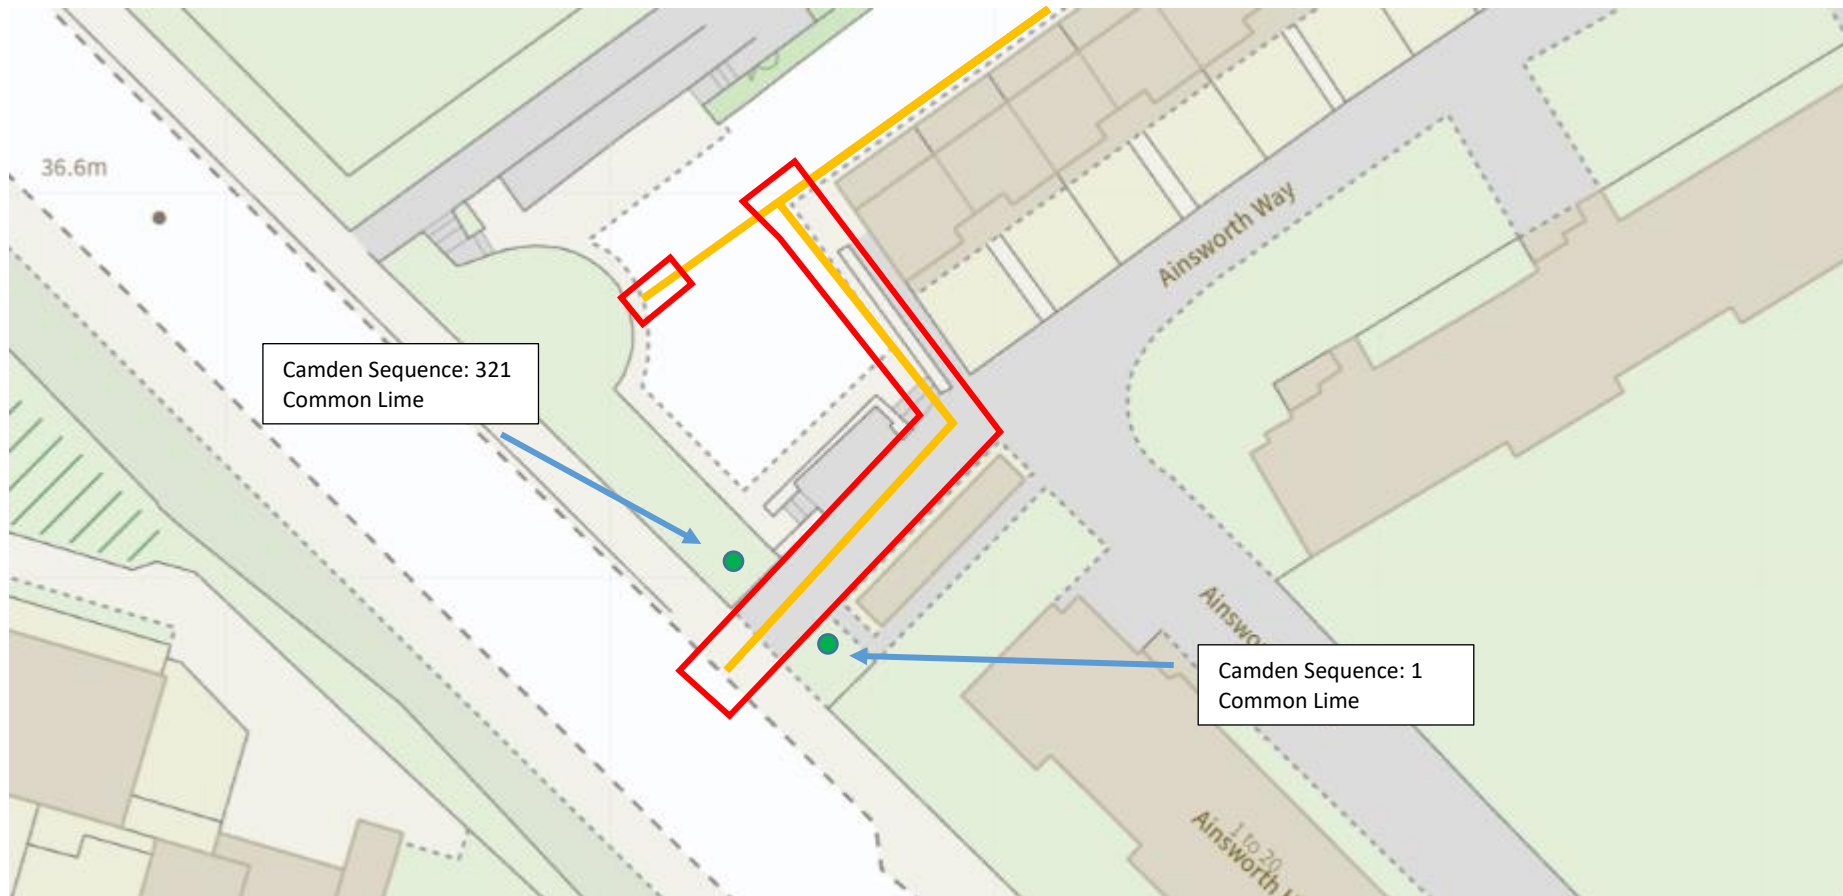

Trees to be affected by gas mains replacement works (including trial holes) are highlighted below. This purely consists of severing roots to access the existing gas mains which are located within public highway and footpath. Above-ground works (ie. branch pruning) will not be required for these works.

● = Tree Affected Protected by Conservation Area

— = Location of Gas Main

□ = Location of Essential Gas Works (Excavations within the Zone – Exact Location & Dimension Unknown)

J/C Ainsworth Way and Abbey Road

Trees to be affected by gas mains replacement works (including trial holes) are highlighted below. This purely consists of severing roots to access the existing gas mains which are located within public highway and footpath. Above-ground works (ie. branch pruning) will not be required for these works.
