CUSTOMER DATA

UCLH Podium EGA x3

FRONIUS International GmbH accepts no guarantee for the completeness of the module and inverter data used or any false configurations created by the configurator, or faulty or inefficient system sizing. All liability claims against Fronius relating to damages of a material or conceptual type which were caused through the use of the Solar configurator are basically excluded unless there is any demonstrably deliberate or grossly negligent fault on the part of Fronius. The Quick sizing is based on the following assumptions: No country-specific consideration of cosPhi, AC voltage, unbalanced loading or capacity limitation. Place of installation < 2000m. Specific yield for storage calculation = 1000 kWh/kWp. 2/5 Fusing recommendation based on IEC 60364-7-712:2016. Deviations due to country specific requirements by utilities or authorities may occur.
