2022/3761/T	Susan Blum	25/09/2022 09:10:23	OBJ	I would be very sorry to see the Plane tree be felled. It is not of danger to the tree surgeon reports of which I have been made aware by the owners of the property.

2022/3761/T	Elizabeth	24/09/2022 18:49:07	OBJ	I object to the felling of this tree without further evidence that it is the cause of damage. It is a long established and beautiful tree that contributes to the neighbourhood and stature remaining. I imagine that insurers would prefer that all trees remain as to remove the slightest risk of damage however in the light of the impact it seems important that it is incontrovertible that the tree has caused damage by an independent report. I would also suggest that if there is damage caused by the eucalyptus tree at no 50. This is a relatively recent tree and understanding that eucalyptus trees have shallow long extending roots with neighbouring buildings. This (eucalyptus) tree should probably not be felled.

2022/3761/T	David Yeo	25/09/2022 08:40:15	OBJ	<p>I live next door on 54 Regent's Park Road. There is absolutely no reason to fell this majestic tree. There are very few substantial trees along this road. Yes the tree is quite tall and perhaps it needs to have its height reduced and the heavy Ivy growth around it removed. But felling it to the ground when it's been under TPO for years? What's the justification for that?</p> <p>The tree provides much needed habitat for birds and squirrels in the area. Trim and top the tree maybe but we absolutely object to felling this tree to the stump!</p>

2022/3761/T	Richard Ward	25/09/2022 23:23:38	OBJNOT	<p>This tree is part of our neighbourhood. Every morning I wake up and draw the curtains and my life is enriched by this splendid tree. Now someone wants to take this away....why?</p> <p>- the evidence presented is at best incomplete.....structural movement is small until the last reading in August - one of the driest summers on record - and surely not representative. Is this enough to kill this magnificent tree?</p> <p>- the option of pruning the tree to reduce/stop root growth is not properly considered...simply dismissed in one paragraph...why? Is it more expensive?</p> <p>- instead the Swiss insurer and expert based in Colchester (not part of our neighbourhood) choose the cheapest solution to fell the tree....when they themselves admit that a more costly option is available of keeping the tree but strengthening the foundations of Auden Place.</p> <p>This splendid tree has lived on this site far longer than Auden Place and brings so much enrichment to me and others in the neighbourhood. That's why Camden has placed a TPO on it and marked the area as a tree conservation area. Please do not be swayed by a Swiss insurer and consultant who want the cheapest solution for them... to the detriment of the community and neighbourhood. Do not allow this magnificent tree to be felled.</p>
2022/3761/T	Susan Blum	25/09/2022 09:10:19	OBJ	<p>I would be very sorry to see the Plane tree be felled. It is not of danger to others by its height, according to two tree surgeon reports of which I have been made aware by the owners over recent years.</p>
