2022/3332/P	Richard Savage	02/10/2022 14:41:27	COMMNT	<p>Hello,</p> <p>The current external condenser from the underground swimming pool is very noisy so it would be good to have some reassurance that this solution will both be not be visible from our garden and most importantly silent. It comes on intermittently throughout the day so it may need also to be set to run at night? It may require additional sound proofing and taller chimney to alleviate noise pollution. We have asked for the noise to be looked at previously but been ignored to date.</p> <p>Alternative site further away from our boundary may well be an alternative solution.</p> <p>Many thanks</p>
