

Method Statement installation wood-burning stove.

2 Regent Square WC1H 8HZ

2022/2934/P + 2022/3521/L

- Breaking out of a small inspection port in the modern blockwork in order for a chimney sweep to assess the state of the firebox and chimney
- The chimney is swept and confirmed clear
- The blockwork is carefully removed up to the lintel, leaving in place all historic brickwork
- The firebox is cleared of all builders spoil
- Brickwork is inspected and confirmed sound, cleaned and sealed with a heat resistant product.
- A slate hearth of 25mm thickness is laid on a suitable sub-base and clearance geometries maintained in accordance with Building Regulations J
- A DEFRA authorised stove, including register plate, double lined stainless flue, data plate and top pot is fitted and commissioned by HETAS registered engineers.
- A carbon monoxide alarm is fitted within the same room as the burner.
