KINGSLEY PLASTICS LTD - GRP KIOSK LIFTING & FIXING DETAILS - EXAMPLE KIOSK

Kingsley buildings are manufactured with strengthened ground bolt fixing positions along the internal base frame. On most kiosks, these are located within each corner. On large kiosks, there are additional fixing points at regular intervals along each wall to a maximum spacing of 1.5m. (see diagram 1.2)

On some kiosks - notably acoustic and insulated kiosks - the ground bolt fixings are rust protected angle iron brackets which are fixed to the base frame at suitable points.

As far as the ground bolts are concerned, we supply suitable ground bolts with every kiosk. These are M12 x 140 drop-in Rawlbolts to make installation easier. (see diagram 1.1)

Internal Base Flange Details

To install a GRP Kiosk, follow the instructions below:
