2022/3487/P	Robert Buchanan and Christine Buchanan	19/10/2022 11:01:43	OBJ	Our property faces the side elevation of the proposed development. Our only objection is to the installation of solar panels on top of the new roof extension. From the drawings it appears that these will be installed at an angle of approx 45 degrees to the roof, and will therefore be visible from nearby properties, especially the upper floors of these nearby properties. These panels and their framework are ugly, and not in keeping with the local Conservation Area. If the solar panels were to be laid flat on the roof, and therefore not visible from other properties, we would have no objection.
