

**Subject:** Howitt close planning applications ref 2022/3635/P

As previously explained, I have lived opposite The Close since the 1970s. I would not like the skyline to change, I think it will create people looking down on us, a shadow of lights. In the last few weeks there is a new security light, from Howitt Close lower floor which shines brightly and suddenly into my window. This to me is an indication of what would happened if this plan was executed. Nevermind, the effects of building works on that curve, where there have been accidents over the years.

My other objections is that it will change the appearance of the area and surely that goes against the conservation area.

I understand it would mean removal of water storage on the premises that's worrying.

Yours sincerely

K Foster
