Principal Planning Officer

Subject: Re: planning

Hi Kate,

Maybe I am mistaking with the building where I live which I do not know the name. I have been living here for 13 years, but I am always out.

I live at 5-7 Belsize Grove, NW3 4UT. This building I supposed was developed in the early 19 or late 18 century.

Kind regard,

Juveniu

Subject: RE: planning

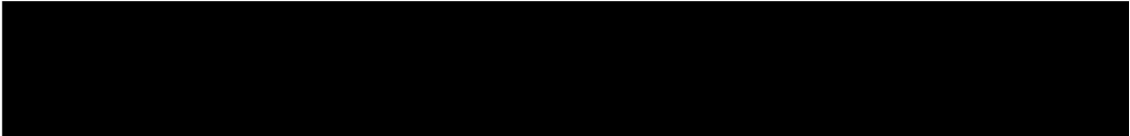

Dear Juveniu,

Thank you for your email. Do you have the address or reference number of the application to which you refer?

Kate Henry

Subject: planning

Hi, I got a leaflet saying there is a planning for a development over our building where we live. I find no reason to object to this planning, I think is good idea, development is always good. The only thing I am concerning is that; this building is old and need a serious repair on its foundation, I have notice that the front left part of the building is sinking and the windows is falling. There is a big crack on the wall by the front window which required a repair very soon. It seems to me that due to the water from the rain goes into the soil that leads to the foundation giving in. That is my knowledge.

If they going to add more store over this building, firstly of all they have to repair the foundation.

I live at Flat 12, I have designed made lots of building before when I was younger. If you need any help...

kind regarding,

Juveniu
