██████████ 190A Fordwych Road, London, NW2 3NX

To whom it may concern,

I am a Community Mental Health Recovery Support Worker at Mind in Camden. Our team at Mind in Camden have been supporting ██████████ with his mental health issues since November 2021.

There is an on going planning permission dispute concerning ██████████ family home where he is currently residing. The dispute is centred around extensions to the property that were built 4 years ago.

As a mental health professional, I believe the additional space the extension provides is crucial for maintaining Mr Allaf's mental health. I believe any decision that may result in the alteration of such extensions would be detrimental to ██████████ mental health, as it would cause him considerable anxiety. The resulting knock on effects of this would be overwhelmingly negative for both ██████████ and his family.

If you would like to have any further conversations around the impact of this planning dispute on ██████████ please do not hesitate to contact me.

Yours sincerely,

Hamish Miller

Community Mental Health Recovery Support Worker
