

The Semi Vertical Bike Rack is designed for areas where space is at a premium. The cycle racks can

be infinitely extended making them ideal for commercial applications; both internally and externally.

They are extremely flexible, either being placed against a wall or back to back, creating a central island and drastically increase the usage of space. The secure locking loop allows for additional security with the use of a D-Lock to secure both the frame and wheels. This product has been designed to be BREEAM Compliance, for further information please contact us.

## FEATURES

- 305mm spacing between racks and a staggered height allows for highest density bicycle parking possible
- Hot dipped galvanised to BS EN ISO 1461:2011
- Accommodates all bike types
- SECURE-includes a locking Loop for securing your front wheel and frame to the stand
- Can help achieve Code for Sustainable Homes and BREEAM compliance
- Design service with manufacturing to your layout
- Professional installation service available

## BASE RECOMMENDATIONS

The unit is bolted to the ground, so a firm, level ground area is required for installation. We recommend a concrete base that is to a minimum thickness of 50mm.

## DIMENSIONS

Rack Height	1705mm
Depth	1115mm
Access depth	Minimum 750mm
