Dear David

I am objecting to the building of this large tower which shows no architectural interest and is far too big for the area, not to mention the further detriment to the inner city environment - that Camden's own policy aims to protect and a lot of council tax payers money has been spent on, to protect us residents from pollution caused by traffic etc - surely demolition of existing buildings and rebuilding them to unsightly eye watering heights adds to chronic pollution in the atmosphere and negates all the value of pocket parks? plus if this proposal is let through the floodgate will be open to all the other developer's to build their own 74 meter high tower in this Conservation Zone.

Please take some cultural and environmental responsibility for ours and future generations by stopping this proposal.

Major impacts such as these described here can progressively and fundamentally erode the character of conservation areas and the significance of nearby listed buildings, and it is important to recognise therefore that the harm identified above is a very serious issue. There is no justification for the extensive harm that will be caused if this development is waived through.

Sincerely

Sheila Clifford
