RI pwn one of the flats at 114 South Hill Park, next door to 112, where the tree pruning application has been made.

I just want to say that having read the application, I'm not sure if 4 metres off the top will be enough. It really needs to be pruned so it's well below the level of gutter as leaves and twigs block our gutter and during a storm, risk flooding the lower flats from water overflowing from the gutter.

I'd appreciate if you would add this to the comment on the application.

Many thanks.
