

Subject: Objection to a planning application

Re Planning Application No., ref: 2022/3635/P

I am emailing to object to the application above to add another storey to this housing block on Howitt Close NW3. This building has a unique character and adding another floor increases the bulk considerably beyond neighbouring buildings

It would be far more appropriate to rigorously examine the carbon footprint of the building and improve where necessary and further to implement a programme of work to all the building to improve insulation to lower its energy consumption to modern levels.
