2022/4042/P	sarah mansfield	16/11/2022 10:05:38	OBJ	<p>I would like to raise concerns about the proposed building works in terms of both light and privacy. I am the owner of the ground floor flat (65A) next door to the proposed building works. The proposal to build a further rear roof extension at second floor level will create an imposing block to our light on the ground floor. Adding a balcony to this second floor extension will mean a significant loss of privacy as this will create a high viewing platform for our neighbours to see into both our garden/home but also to our neighbours in all directions. I do not believe that such an extension has previously been granted in our protected area and i would like to think that this is for good reason. We live in a very close terraced house community and increasing height will add to both the lack of light but the reduction in privacy for many people.</p> <p>I have had no notification or consultation about this proposal and thankfully found out about the proposed works because of the planning application notifications outside. I appreciate that this is not a grounds for complaint but it has not helped me to fully understand what is being proposed and leads me to believe that this is not being undertaken in a good and open spirit. I hope that the council can scrutinise this application on the basis of these concerns.</p>
