Objection

Do you have any comments or consider that the proposal is harmful to or does not preserve the character and appearance of the conservation area?

The Committee objects to the proposals as the new accessible ATMs will further erode the character of this interesting building which is in a highly prominent location at the heart of the commercial zone of the Conservation Area. The CAAC considers that the horizontal marble cill detail is a fundamentally important characteristic of this building's streamlined moderne design and it is proposed that this will be broken through by both new ATMs, whilst the existing lower ATM which already cuts through the cill is to be blocked off. A more sympathetic and acceptable approach would be to replace the existing accessible ATM - this should be used for one of the new positions so that the cill only needs to be broken through in one further location rather than two. This would also enable a simple glazing repair to be made (rather than a stainless steel blanking plate being used) for the non-accessible ATM position that is no longer required.
