Subject: Re Great Ormond Street Hospital Planning

Dear Patrick Marfleet

Both my daughter and myself live at 16c Great Ormond Street and oppose the proposed GOSH development as it stands. We attended the drop in at GOSH and I am concerned about the following / oppose the work as it stands.

There must be possible solution for the building plans to be altered so that it is not such a drastic project - where the hospital can get what it needs without crazy architecture / expenditure.

The issues locally are:

- 1) 30 ton lorries causing road danger, diesel particulate pollution, dust, disruption and reckless noise and vibration
- 2) Excessive building size and A/C noise
- 3) Failure to consult or engage meaningfully with the local community
- 4) Risk to community children in local hospitals, schools, Coram's Fields from respiratory/other illnesses caused by fumes/waste/emissions
- 5) Current site has outgrown hospital needs and is no longer fit for purpose
- 6) Hundreds of objections unanswered
- 7) Plans do not reflect original proposal
- 8) Devastation of local community - Local businesses and livelihoods will be sincerely impacted. The area will become unrecognisable.

I anticipate your response.

Yours Sincerely

Nicola Magliulo
