Objection

Do you have any comments or consider that the proposal is harmful to or does not preserve the character and appearance of the conservation area?

This application is infuriating. The CAAC objected to the original proposed height of this cycle store and the applicants revised their scheme to suit this. They then built that larger shed and are now seeking to have this approved retrospectively. There is no information on the application case file to justify this and this seems to be merely an attempt to get away with ignoring a planning restriction. Please refuse this and enforce.
