Dear Planning

I act for the owners of the adjoining building 2, Menelik Road and I am a little concerned about the certificate of development 2022/3921/P for 4 Menelik Road London Camden NW2 3RP, the roof extension and rear ground floor extension will reduce the daylight to various ground floor habitable rooms together with affecting the ancient rights of light in particular to the ground floor flat 2 rear window. The application failed to show the windows of No2 and seems a little flexible when showing the ground and the height of the extension particularly as they sent no actual photos of the existing, I enclose two that show the rear part of 2 Menelik

Sincerely

Alex Imlach
